Holden Statesman / Caprice WH Series June 1999 - (WH Series II: September 2001 -) The WH Statesman / Caprice are based on the VT Commodore. The WH is also exported to the Middle East and badged as a Chevrolet Caprice. Some changes introduced with the Series II include: The new rear suspension on Series II - known as Control-Link independent ...

Holden WH Statesman / Caprice

I'm guessing Holden probably used a similar resistor pack setup for 1-2-3-4 on low series. High speed is simply a relay bypassing the resistor pack so the fan is supplied directly with full 12V. For some reason when they die, the relay stays open (which is located on a different circuit to the internal HVAC controls) and the high speed fan ...

Commodore fan won't stop after stopping - Holden

I got my genuine self leveling replacement shocks for my WH Grange from a guy who stocks surplus HSV and Holden parts in Victoria, they cost me \$120 back in January. My problem now is the the shocks seem to pump up to full all the time with absolutely no load in the back at all, I'm not really into the 4x4 grange look (ha ha) do you guys have ...

Having recently taken possession of a WH, I've found the battery is dead if I don't drive it within a 3 day period. Spent time checking every possible cause starting with removing every single fuse and whatever else that was plugged in to both fuse boxes, which made no difference to the current draw, so I got to unplugging everything electrical from the engine and under the dash, til I ...

Holden Interior Switches & Controls for Holden Statesman ...

In July 2001, a recall was issued for certain Holden WH Statesman and Caprice vehicles that were manufactured between June 1999 and March 2001. In these vehicles, an interruption of the electrical current to the fuel pump relay, fuel pump connectors and low-beam headlight relay could cause the fuel pump and low-beam lights to fail.

Yeah put the A/C on and the fan should also come on. In the engine bay on the drivers side there is a relay/fuse box, you will have two fan related relays, one that is labelled as fan low (the smaller of the two relays), remove this relay and let the engine idle with the A/C off. Put a test light or multimeter between pins 1 & 2 (relay coil).
