"Ideas" is an excellent synthesis of intellectual history from prehistoric times through the end of the nineteenth century. Although it seems to me to emphasize the Western contribution to the history of ideas, the book also covers ideas from the pre-Columbian Americas, from Asia and from the Middle East.

history of ideas starts with the biological evolution of man and ends around 1900.

Watson's earlier book ("A terrible beauty") picks up from there.

This particular book is written in very readable prose, better than Watson's earlier book.

Intellectual history, also known as the history of ideas, refers to the study of the history of human thought and thinkers. This history cannot be considered without the knowledge of the humans who created, discussed, wrote about, and in other ways were concerned with ideas. Intellectual history as practiced by historians is parallel to the history of

The vision of the world presented by a history of ideas is a porous one, in which knowledge and invention cross state borders though their progenitors may not. It is also a cooperative one. No modern discovery can be said to be the work of any one civilization. When America went to the moon, so too did the Hindus, Arabs, Greeks and Chinese.
